Webb

Designed by Burkhard Vogtherr

Named for its iconic woven back, Webb represents the ultimate combination of contemporary styling and comfortable seating. Webb chairs showcase the collaborative effort between Davis and DuPont to create a technology that enhances both the aesthetic appeal of the design and the user's overall experience.

Offered in several versions, the high and mid back Executive chairs feature a proprietary patented mechanism with synchronized back and seat tilt. This form of passive ergonomics means the seat slides forward as the back reclines, keeping your feet on the floor as you recline in the chair. Able to lock in any position, this mechanism allows the user to find a healthier, more comfortable work posture with ease. The stationary side chairs offer executive level comfort in guest seating.
