Ling

Designed by Jonathan Prestwich

Linq by Jonathan Prestwich is based on the concept of organic engineering; this chair was fabricated from the very beginning with functionality, comfort, and optimal design in mind. Linq's design is centered upon a mechanism that follows the body's natural movement. With a simple and efficient structure, this mechanism can adapt to the form and weight of the user. This user-centric design delivers increased flexibility and dynamic support for all day use.

"I wanted to make a chair that moved and followed the human form. A chair that articulated in a simple way and was made up of only the bare necessity of parts." - Jonathan Prestwich

The sculptural elements of Linq combine to make a strikingly beautiful piece. With shapes inspired by nature and materials chosen specifically for comfort, Linq is a product that matches how we live and work. Perfect for conferencing or individual task work, Linq has the comfort and flexibility needed for everyday use without sacrificing good design.
